

Altpgen App Registration steps

In order to use the altpgen tool, you need to do App registration first. This step is necessary from Business Central 2024 release wave 1 (BC24), and main reason for it is security.

1. First step is to login to Azure portal <https://portal.azure.com> and search for “App registration” and then go for “New registration”

2. Enter the name and choose preferred option for account types and Create the app

Microsoft Azure Search resources, services, and docs (G+)

Home > App registrations >

Register an application

* Name

The user-facing display name for this application (this can be changed later).

altpgen-bctechdays

Supported account types

Who can use this application or access this API?

☐ Accounts in this organizational directory only (Development only - Single tenant)

☒ Accounts in any organizational directory (Any Microsoft Entra ID tenant - Multitenant)

☐ Accounts in any organizational directory (Any Microsoft Entra ID tenant - Multitenant) and personal Microsoft accounts (e.g. Skype, Xbox)

☐ Personal Microsoft accounts only

[Help me choose...](#)

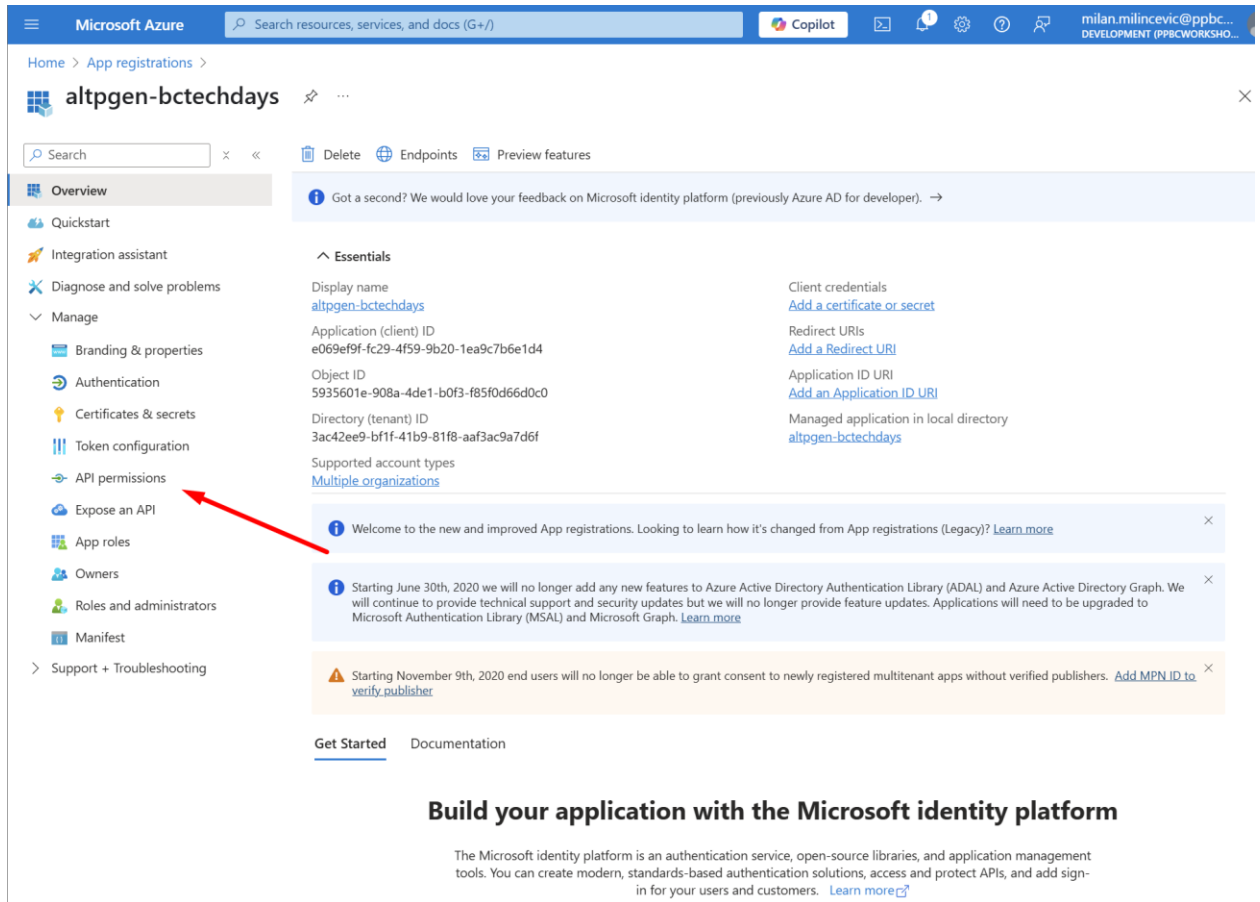

Redirect URI (optional)

We'll return the authentication response to this URI after successfully authenticating the user. Providing this now is optional and it can be changed later, but a value is required for most authentication scenarios.

Select a platform e.g. https://example.com/auth

Register an app you're working on here. Integrate gallery apps and other apps from outside your organization by adding from [Enterprise applications](#).

3. Once the registration is created go to “API Permissions” tab

The screenshot displays the Microsoft Azure portal interface for an application registration named 'altpgen-bctechdays'. The left-hand navigation pane is expanded, showing the 'API permissions' tab selected, indicated by a red arrow. The main content area shows the 'Essentials' section with various application details and links to manage client credentials, redirect URIs, and application ID URIs. Below this, there are three informational banners: a welcome message, a notice about ADAL and Azure Active Directory Graph deprecation, and a notice about MPN ID verification. At the bottom, there is a section titled 'Build your application with the Microsoft identity platform' with a brief description and a link to learn more.

Welcome to the new and improved App registrations. Looking to learn how it's changed from App registrations (Legacy)? [Learn more](#)

Starting June 30th, 2020 we will no longer add any new features to Azure Active Directory Authentication Library (ADAL) and Azure Active Directory Graph. We will continue to provide technical support and security updates but we will no longer provide feature updates. Applications will need to be upgraded to Microsoft Authentication Library (MSAL) and Microsoft Graph. [Learn more](#)

Starting November 9th, 2020 end users will no longer be able to grant consent to newly registered multitenant apps without verified publishers. [Add MPN ID to verify publisher](#)

Get Started Documentation

Build your application with the Microsoft identity platform

The Microsoft identity platform is an authentication service, open-source libraries, and application management tools. You can create modern, standards-based authentication solutions, access and protect APIs, and add sign-in for your users and customers. [Learn more](#)

4. Next step is to add proper permissions

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and the user profile 'milan.milincevic@ppbc...'. The left sidebar contains a list of navigation options: Overview, Quickstart, Integration assistant, Diagnose and solve problems, Manage (with sub-items: Branding & properties, Authentication, Certificates & secrets, Token configuration, API permissions, Expose an API, App roles, Owners, Roles and administrators, Manifest), and Support + Troubleshooting. The 'API permissions' option is selected and highlighted.

The main content area is titled 'altpgen-bctechdays | API permissions'. It features a search bar, a refresh button, and a 'Got feedback?' link. Below this, there are two informational banners: one about granting tenant-wide consent and another about the 'Admin consent required' column. The 'Configured permissions' section explains that applications are authorized to call APIs when granted permissions by users/admins. It includes a table of configured permissions:

API	Permissions name	Type	Description	Admin consent req...	Status
Microsoft Graph (1)					...
	User.Read	Delegated	Sign in and read user profile	No	...

Below the table, a note states: 'To view and manage consented permissions for individual apps, as well as your tenant's consent settings, try [Enterprise applications](#).'

A red arrow points to the '+ Add a permission' button located above the table.

5. Choose Dynamics 365 Business Central

The screenshot shows the Microsoft Azure portal interface. On the left, the navigation pane is open, showing the 'API permissions' section under 'Manage' for the application 'altpgen-bctechdays'. The main area displays the 'Request API permissions' dialog. The 'Select an API' tab is active, showing a list of commonly used Microsoft APIs. A red arrow points to the 'Dynamics 365 Business Central' API, which is described as 'Programmatic access to data and functionality in Dynamics 365 Business Central'. Other APIs listed include Microsoft Graph, Azure Rights Management Services, Azure Service Management, Dynamics CRM, Intune, Office 365 Management APIs, Power Automate, Power BI Service, SharePoint, Skype for Business, and Yammer.

To view and manage configurations, click on the API name.

Request API permissions

Select an API

Microsoft APIs APIs my organization uses My APIs

Commonly used Microsoft APIs

Microsoft Graph
Take advantage of the tremendous amount of data in Office 365, Enterprise Mobility + Security, and Windows 10. Access Microsoft Entra ID, Excel, Intune, Outlook/Exchange, OneDrive, OneNote, SharePoint, Planner, and more through a single endpoint.

Azure Rights Management Services
Allow validated users to read and write protected content

Azure Service Management
Programmatic access to much of the functionality available through the Azure portal

Dynamics 365 Business Central
Programmatic access to data and functionality in Dynamics 365 Business Central

Dynamics CRM
Access the capabilities of CRM business software and ERP systems

Intune
Programmatic access to Intune data

Office 365 Management APIs
Retrieve information about user, admin, system, and policy actions and events from Office 365 and Microsoft Entra ID activity logs

Power Automate
Embed flow templates and manage flows

Power BI Service
Programmatic access to Dashboard resources such as Datasets, Tables, and Rows in Power BI

SharePoint
Interact remotely with SharePoint data

Skype for Business
Integrate real-time presence, secure messaging, calling, and conference capabilities

Yammer
Access resources in the Yammer web interface (e.g. messages, users, groups etc.)

6. Choose delegated permissions

The screenshot shows the Microsoft Azure portal interface. On the left, the navigation pane is open, showing the 'API permissions' section under 'Manage' for the application 'altpgen-bctechdays'. The main area displays the 'Request API permissions' dialog for 'Dynamics 365 Business Central'. The dialog asks 'What type of permissions does your application require?' and offers two options: 'Delegated permissions' (highlighted with a red arrow) and 'Application permissions'. The 'Delegated permissions' option is described as 'Your application needs to access the API as the signed-in user.' The 'Application permissions' option is described as 'Your application runs as a background service or daemon without a signed-in user.'

9. Add a platform

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and the user profile 'milan.milincevic@ppbc...'. The breadcrumb trail indicates the current location: 'Home > App registrations > altpgen-bctechdays'. The main heading is 'altpgen-bctechdays | Authentication'. The left sidebar contains a list of navigation options: Overview, Quickstart, Integration assistant, Diagnose and solve problems, Manage, Branding & properties, Authentication (selected), Certificates & secrets, Token configuration, API permissions, Expose an API, App roles, Owners, Roles and administrators, Manifest, and Support + Troubleshooting. The main content area is titled 'Platform configurations' and includes a description: 'Depending on the platform or device this application is targeting, additional configuration may be required such as redirect URIs, specific authentication settings, or fields specific to the platform.' Below this is a button labeled '+ Add a platform', which is highlighted by a red arrow. Underneath is the 'Supported account types' section, which asks 'Who can use this application or access this API?' and provides two radio button options: 'Accounts in this organizational directory only (Development only - Single tenant)' and 'Accounts in any organizational directory (Any Microsoft Entra ID tenant - Multitenant)'. The second option is selected. Below the radio buttons is a link 'Help me decide...'. There are two warning messages in yellow boxes: one about personal Microsoft accounts and another about the November 9th, 2020 deadline for granting consent to newly registered multitenant apps. The 'Advanced settings' section follows, with a toggle for 'Allow public client flows' set to 'No'. Below this are three bullet points: 'App collects plaintext password (Resource Owner Password Credential Flow)', 'No keyboard (Device Code Flow)', and 'SSO for domain-joined Windows (Windows Integrated Auth Flow)'. The 'App instance property lock' section is also visible, with a 'Configure' button.
